SCIENTIFIC RATIONALE

Lung cancer is the first cause of death for tumors worldwide.

However several improvements have been obtained mainly due to the increased biologic knowledge.

In fact today with the term lung cancer we consider a group of several diseases, distinguished according to histology and molecular features.

These aspects are fundamental in order to define the most active therapeutic strategies. This landscape is rapidly evolving and every year new data are available.

So far it is particularly important to have the possibility to discuss the new data together with outstanding experts in order to improve the knowledge for a better cure for patients.

SCIENTIFIC PROGRAM

08.30 Registration

09.00 Introduction from the Scientific and General Directors and from Scientific Chairs

Early stage non small-cell lung cancer

Chairs

E. Parisi Meldola
S. Tamberi
A. Romeo Meldola

09.45 Surgery after neoadjuvant chemo-immunotherapy: more difficulties and how to overtake them
D. Argnani Forlì

10.00 Neoadjuvant approaches in early stages, non oncogene addicted NSCLC: how to choose between pre and peri operative approach
A. Ardizzoni Bologna

10.15 Adjuvant approaches in early stages: an evolving landscape
F. Passiglia Orbassano

10.30 Stage IIIB unresectable, locally advanced NSCLC
M. Tiseo Modena

10.45 Radiotherapy as an alternative to surgery in early stage NSCLC
A. Filippi INT

11.00 Discussion

11.15 Coffee Break

Oncogene addicted, advanced diseases (Session also accredited for Nurses and Biologists)

Chairs

N. Normanno Meldola
P. Ulivi
L. Crinò Meldola

11.30 Sex and gender in lung cancer: which role?
R. Berardi Ancona

11.45 Liquid biopsy in lung cancer: where are we?
U. Malapelle Napoli

12.00 EGFR mutants: different therapies for different tumors
A. Passaro Milano

12.15 KRAS oncogene addicted tumors
D. Cortinovis Milano

12.30 Rare oncogene addicted tumors (ALK, ROS1, BRAF, RET, MET, NTRK, HER2)
K. Andrikou IRST

12.45 Antibody Conjugates in lung cancer
F. Cappuzzo Milano

13.00 Discussion

13.15 Light Lunch

SCIENTIFIC PROGRAM

Advanced non-oncogene driven diseases

Chairs

C. Bennati

L. Ridolfi Meldola

14.15 Artificial Intelligence in lung cancer

A. Prelaj Milano

14.30 Immunotherapy in NSCLC: how to use it

R. Chiari Pesaro

14.45 Mechanism of Resistance to immunocheckpoint inhibitors

G. Lamberti Bologna

15.00 New ways in immunotherapy

S. Pilotto Verona

15.15 Phase 1 clinical trial: advantages and limits in NSCLC

D. Gennaro Roma

15.30 Discussion

Rare Thoracic Cancers (Session also accredited for Nurses and Biologists)

Chairs

D. Tassinari

A. Delmonte Meldola

15.45 Tumors of the Thymus: future perspectives

T. M. De Pas Bergamo

16.00 Small Cell Lung Cancer: state of the art for local and extended disease

A. Verlicchi IRST

16.15 Small Cell Lung Cancer: new therapeutic options

F. Bertolini Modena

16.30 Pleural mesothelioma: a new landscape?

L. Calabrò Ferrara

16.45 Discussion

17.00 Conclusions

IRST IRCCS MELDOLA "Dino Amadori"
UFFICIO FORMAZIONE:
ufficio.formazione@irst.emr.it

CREDITI ECM

Evento n° 2773 - 473506

Obiettivo n. 3

N. 7 crediti ECM per:

- Medici (Malattie dell'apparato respiratorio; Oncologia; Radioterapia; Chirurgia Generale; Anatomia Patologica; Medicina Nucleare; Radiodiagnostica)

Evento n° 2773 - 473510

Obiettivo n. 3

N. 3 crediti ECM per:

- Biologo
- Infermiere

SEDE CONGRESSUALE

**Via Piero Maroncelli, 40,
47014 Meldola (FC)**
