

HCC MULTIDISCIPLINARY SUMMIT

Integrating Surgery, Systemic
Therapy, and Novel Insights

18 Settembre 2026

IRST IRCCS "Dino Amadori"
Meldola (FC)

Responsabili Scientifici:
Ilario Giovanni Rapposelli
Giorgio Ercolani
Carlo Fabbri

PROMOSSO DA
IRST IRCCS MELDOLA "Dino Amadori"
UFFICIO FORMAZIONE:
ufficio.formazione@irst.emr.it

Provider n. 2773 e
Segreteria Organizzativa

RAZIONALE SCIENTIFICO

The landscape of hepatocellular carcinoma is rapidly evolving.

Patient population is changing, with a relative increase of cases with metabolic aetiology compared with the ones derived from chronic hepatitis. Technological evolution allows to refine treatment of localized disease, from percutaneous ablation to mini-invasive surgery.

The advent of immunotherapy resulted in a breakthrough in treatment of advanced disease. Furthermore, new combinations are emerging, thanks to a better understanding of HCC biology, including the complex dynamics of tumor microenvironment.

The introduction of immunotherapy even in early settings, along with its integration with transarterial treatments, discloses new opportunities, that span from an improvement in survival to the promise to increase the rate of conversion to curative approaches such as liver transplantation, with the potential to redefine the boundaries of the whole therapeutic hierarchy.

As a result of this evolution, the management of HCC is gaining more and more complexity, thus the key to success in HCC treatment is multidisciplinary, where all players, working in close collaboration, must be prone to continuously reassess and modify treatment strategy.

The aim of this event is to depict, an overview of HCC management, highlighting up-to-date therapeutic strategies, focusing on multidisciplinary and treatment personalization, and keeping an eye on future directions.

PROGRAMMA SCIENTIFICO

10.30 Registrazione dei partecipanti

10.50 Introduzione e saluti

SESSIONE I

Local treatments

Moderatori

F. G. Foschi Faenza

C. Fabbri Forlì-Cesena

11.00 The importance of tissue sampling: always required?

E. Liverani Forlì-Cesena

11.20 Cutting Edge vs Focused Heat: The Surgeon's Perspective

A. Cucchetti Forlì-Cesena

11.40 Targeting the Tumor: The Ablation Expert's Point of View

C. Serra Bologna

12.00 Discussione

SESSIONE II

Latest innovations

(Session also accredited for Nurses, Biologists and TSLB)

Moderatori

P. Ulivi Meldola (FC)

G. Ercolani Forlì-Cesena

12.10 Liver transplantation: limits and conversion

M. Vivarelli Ancona

12.30 News from biology: glimpse of the future

M. Zanoni Meldola (FC)

12.50 Discussione

13.00 Lunch

SESSIONE III

Systemic treatment and combinations

(Session also accredited for Nurses, Biologists and TSLB)

Moderatori

E. Giampalma Forlì-Cesena

I. G. Rapposelli Meldola (FC)

14.00 Immunotherapy: present and future of first-line

T. Pressiani Rozzano (MI)

14.20 A matter of sequence: new trials to come?

F. Tovoli Bologna

14.40 Therapeutic algorithm for HCC: integrating local, systemic and novel strategies

A. Casadei Gardini Milano

15.00 Discussione

15:10 LECTURE - Crossing the boundaries of stages and treatments: time for a new therapeutic hierarchy?

A. Vitale Padova

15.40 Discussione e chiusura dei lavori

ISCRIZIONE

L'iscrizione si effettua
scaricando
l'APP PROEVENTI

1. Scarica l'app PROEVENTI sul tuo smartphone
2. Crea il tuo account con le proprie credenziali o fai il login se già iscritto
3. Inserire il pin dell'evento:
per Medico Chirurgo/Farmacista HCC26
per Altre Discipline SUMMIT26
4. Ora sei sulla pagina dell'evento, clicca su ISCRIZIONE in alto a sinistra
5. Clicca su ISCRIVITI QUI

CREDITI ECM

Evento n° 2773 – 490377

Obiettivo n. 3

N. 4 crediti ECM per:

- Medici (Tutte le specialità)
- Farmacisti

Evento n° 2773 – 490381

Obiettivo n. 3

N. 3 crediti ECM per:

- Biologi
- Infermieri
- TSLB

SEDE CONGRESSUALE

Via Piero Maroncelli, 40, 47014
Meldola (FC)

SEGRETERIA
